

## Dog Day Care Services

*Work and social commitments force us to leave our beloved dogs alone at home, which can at best lead to boredom, and at worse to separation anxiety, barking, tail chasing and destructive behaviours. Not only that, it eats away the time we would love to spend going out to the local park and socialising with other people and their dogs.*

### **Our professional Dog Day Care service is here to help!**

We have a friendly and qualified team that is knowledgeable and experienced regarding dogs and their needs. *One of our team will pick your best friend up in the morning between 8am and 10am using one of our specially converted fleet, and deliver your dog safely and comfortably to our dog day care centre on our picturesque farm.* Upon arrival, your beloved will have **a fun filled day!**

### **Activities will include:**

- **Play time!** That means socialising with their best buddies, playing with our toys and equipment, running around and enjoying the fresh air. We have *two fully secure outdoor areas catering for all needs, so your dog will be happy, whether highly energetic and athletic, or quietly contemplative and enjoying a relaxed bark with friends.*
- **Walking Time!** Along *our countryside and across our 12000 meter square farm.* The cows, sheep, horses and rare birds will surely prove to be intriguing encounters for your intrepid explorer! **During the walks, we can provide basic obedience training, such as the sit, and walking on a loose leash and recall.**

Not only will it be great fun, but your dog will also benefit greatly from **the variety of new experiences and stimuli** whilst with us. Your dog will:

- *Approach new environments appropriately and **confidently.***
- *Feel **comfortable around other dogs, animals and people.***
- ***Have improved health and wellbeing.***
- ***Get home dog-tired and relaxed,** allowing you the chance to enjoy your dog's company without the abundance of energy.*

Throughout the day **your dog will be under constant supervision at our dog day care.** He or she will have access to a *constant supply of fresh water, and our team can feed your dog, and also administer any required medication.*

***Come the end of the day, we will drop your dog off between 4pm and 6pm.***

We will attend to any requests you have regarding your beloved, such as food and water, medicine, toys/chews and leaving them in a specific area in the house, as well as picking up the post, and turning on the lights and radio if required.

*Lastly, we will leave a comment card with details about the adventures undertaken by your best friend. If you feel words do not fully capture the daily antics, fear not, for we will record and upload videos of the activities that go on at our doggy heaven.*

***You can then view them alone, or whilst proudly showing off to friends and family!***
